| If a goal has not been met please provide a short explanation, including noting any key mitigating actions. | Scale of 65 + population increase not taken into consideration when setting targets, i.e., 1.5% increase applied on 2024/25 when increase estimated at 3% (41,896 to 43,198). Data for September incomplete but projecting total number of 65 + admissions for Apr - Sept to be 4,962 against plan of 4,680. Contributory factor to increased numbers will also have been effects of heatwaves during summer months and particular impact on people living with frailty. Work is in progress via our three Integrate Neighbourhood Teams to embed multidisciplinary enhanced case management for the 10,000 most frail patients that includes regular frailty reviews and rapid support to prevent crises. It is intended that by 31/03/26 every patient with severe frailty will have a care coordinator and a multidisciplinary plan. |
| You can also use this box to provide a very brief explanation of overall progress if you wish. | In addition to the above, there are a variety of initiatives currently in progress or planned that are integral to the implementation of Hillingdon's new model of care that are intended to reduce emergency admissions and maximise independence of our residents. Three Neighbourhood-based Local Access Care Hubs have been established to offer Same Day Urgent Care, planned care for older people (see above), mobile diagnostics and IV antibiotics and wound care management. Additional capacity for some of these services is funded from the BCF. Equally, BCF funding is supporting additional Urgent Community Response capacity to ensure a 2-hour response target for a crisis response services. A borough-wide Reactive Care Coordination Hub is being established that will deploy crisis support services as required. The ICB has commissioned a frailty virtual ward, which once mobilised will provide targeted interventions in residents' homes. This in itiative aims to reduce emergency admissions by offering care within the community. The ICB has also addressed gaps in community and neuro-navigators, which support both discharge and admission avoidance. |

| | | % of Planned Income |
|------------------------------------|-------------|---------------------|
| Q2 Year-to-Date Actual Expenditure | £35,183,369 | 47% |

If Q2 year to date actual expenditure is exactly 50% of planned expenditure, please confirm this is accurate or if there are limitations with tracking expenditure. ICB Minimum NHS Contribution and Additional NHS Contributions are to plan, with exception of community-equipment over-performance of £332k year-to-date based on actuals upto M6. Local authority community equipment cost pressure related to change in provider arrangements is being capitalised using DFG funding.

If planned expenditure by activity has changed since the original plan, please confirm that this has been agreed by local partners. If that change in activity expenditure is greater than 5% of total BCF expenditure, please use this box to provide a brief summary of the change.
