Hillingdon at a glance, 2017

- **Population** – comparing the 2011 Census figures with those with GLA Interim 2015-based population projections, the borough's population in 2017 has increased by approximately 10.9% (from 273,936 to 303,870); by comparison London's population has increased by 8.5%. Over half of Hillingdon's 44.6 square miles is a mosaic of countryside including canals, rivers, parks and woodland. Hillingdon has an average of 25.9 people per hectare; this is the third lowest population density among London boroughs.
- **Gender** – 152,246 of borough residents are male and 151,624 are female.
- **Age** – 21.7% of the borough population is under 16, 6.1% over 75 and 72.1% aged 16-74 (this is defined as working age).
- **Ethnicity** - Hillingdon's White British population decreased from 73% in the 2001 Census to 52% in the 2011 Census; Hillingdon's BAME population increased from 27% to 48% in the same period. Current data (from the Greater London Authority 2015 Round Trend-based Ethnic Group Population Projections) shows that Hillingdon's White British population in 2017 is 43% and the BAME population is 57%.
- **Religion**[1] - the predominant religions in the borough at 2011 are Christian – 134,813 (49.2%), Muslim – 29,065 (10.6%), Hindu – 22,033 (8%) and Sikh – 18,230 (6.7%), we also have a large percentage of residents stating 'no religion' – 46,492 (17%) and other – 23,303 (8.5%).

Manor Ward

Manor lies in the north of Hillingdon and is bordered by Eastcote & East Ruislip, West Ruislip, Cavendish and South Ruislip.

In 2017[2], Manor's population is 12,106 residents, an increase of 5.8% since 2011 (11,442); this is lower than the 10.9% increase for Hillingdon overall. Manor is made up of 197.4 hectares (2 km^{sq}), with 61.3 people per hectare (6,133 per km^{sq}). The average number of people per household is 2.6[3].

Deprivation

The 2015 Indices of Multiple Deprivation (IMD) calculate local measures of deprivation and indicates where each small area is ranked in relation to the whole of England. The map below shows patterns of deprivation within Manor, which is made up of seven LSOAs[4].

---
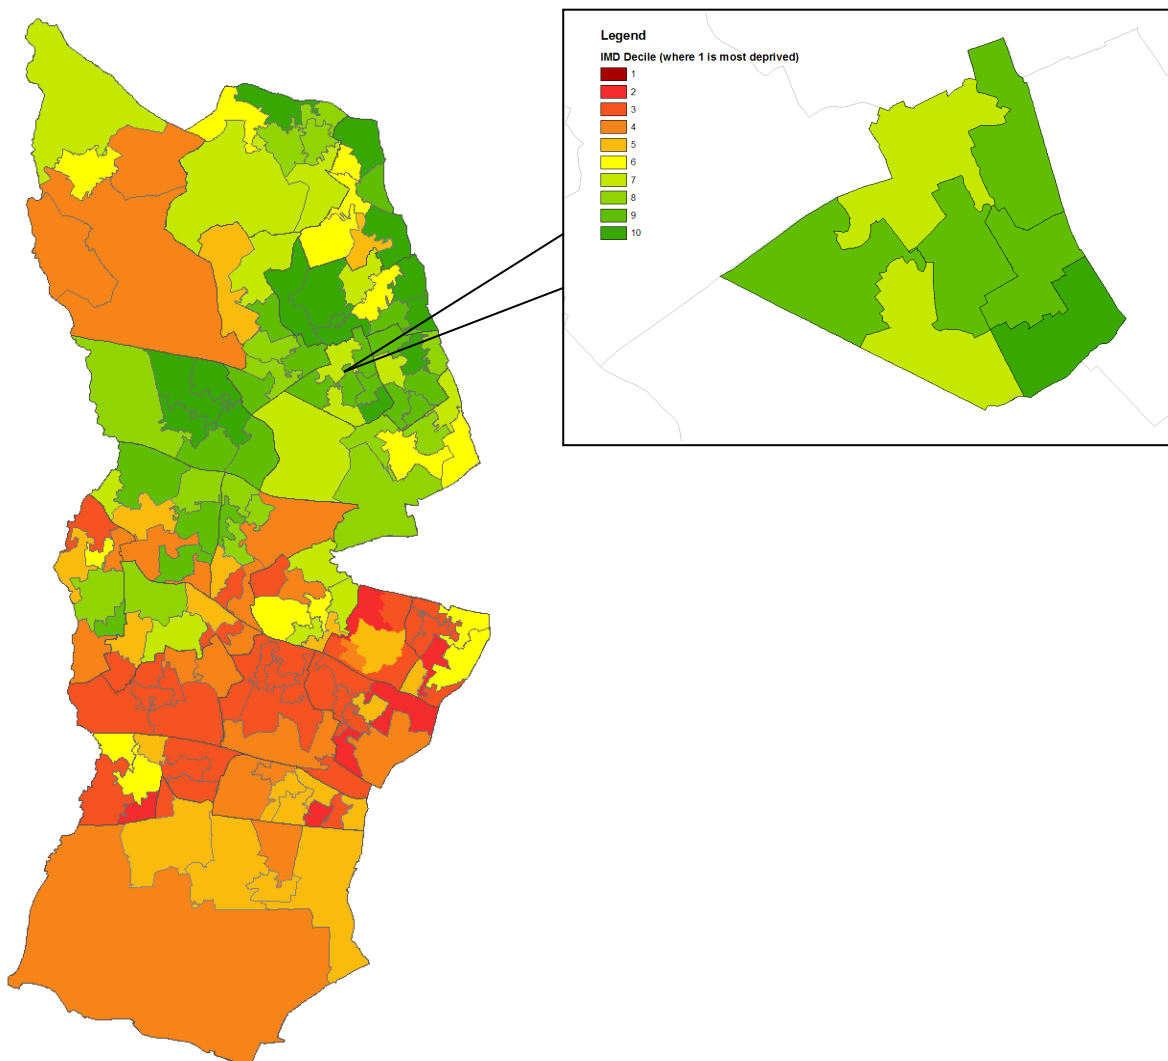

[2] According to GLA Interim 2015-based population projections
[3] People per household statistics are based on 2011 Census data / latest population and ward properties
[4] A Lower Layer Super Output Area (LSOA) is a geographic area. Lower Layer Super Output Areas are a geographic hierarchy designed to improve the reporting of small area statistics in England and Wales.

Ward Population:

Age Population of Hillingdon by wards, 2017

Source: GLA 2017, Interim 2015-based population projections
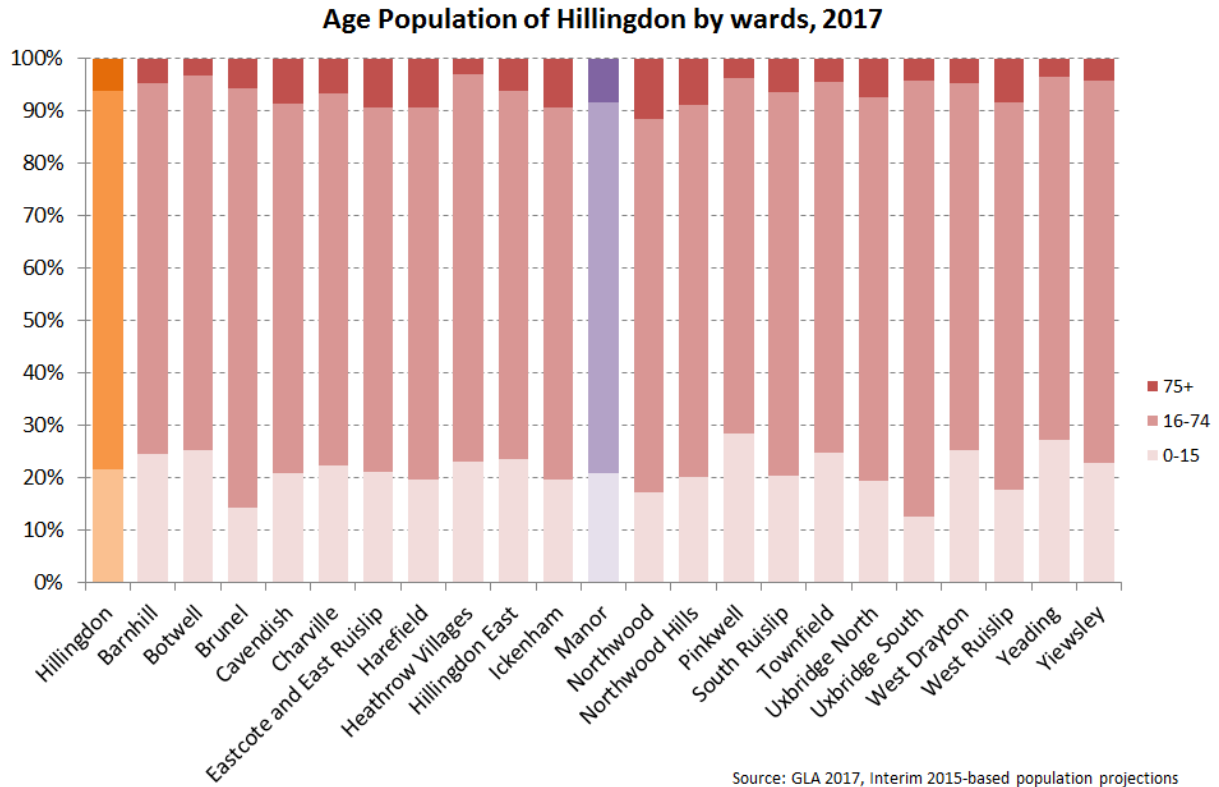

The chart above shows that 20.8% of Manor residents are under the age of 16. 70.8% of residents fall into the working age bracket (defined as a resident aged between 16 and 74) and the remaining 8.4% are over the age of 75.

The chart below shows that in Manor, there are higher numbers of males and females in the 45-49 age bracket when compared to other age groups.

Population pyramid for Manor, 2017

Source: National Statistics, 2015 mid-year estimate
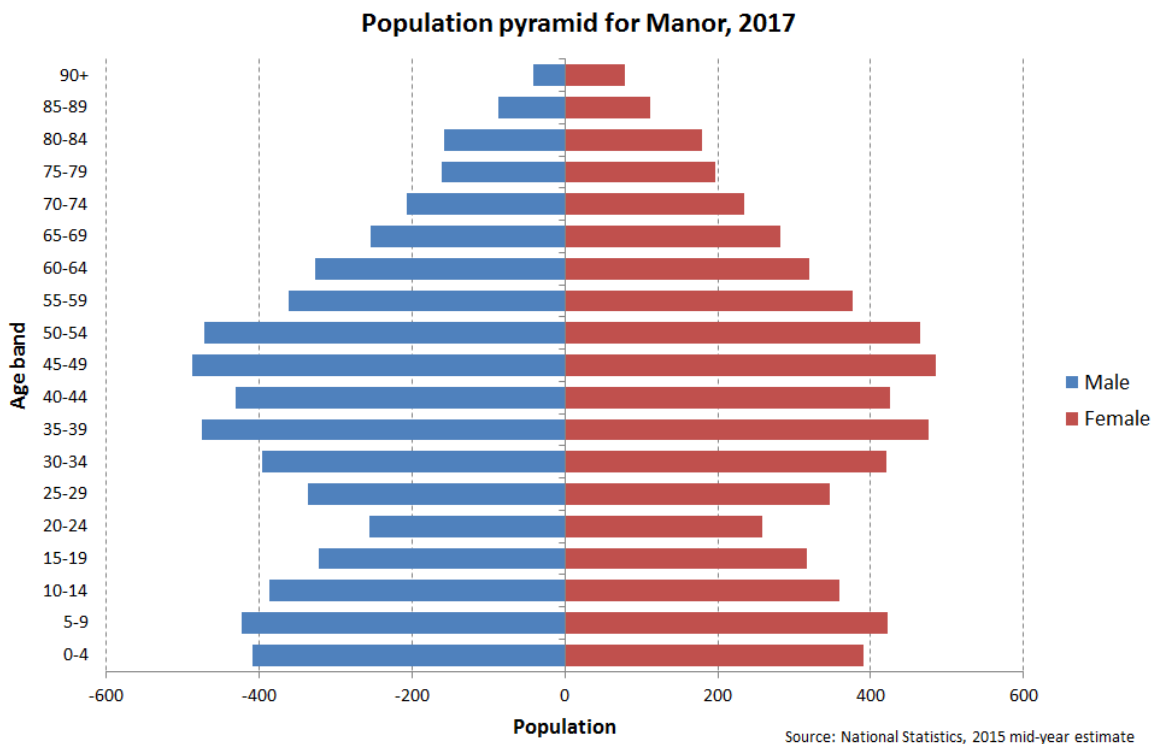

Gender

The proportion of **men to women** in the ward shows that there is difference in gender by 49.5% to 50.5%. This is a small change from 2011 when there was a 48.7% to 51.3% male to female ratio in the ward; so overall the proportion of men has increased relative to decrease in women.

The chart below shows male/female ratios in Hillingdon and ward level:

Male/Female ratio at Hillingdon and ward level, 2017

Source: GLA 2017, Interim 2015-based population projections
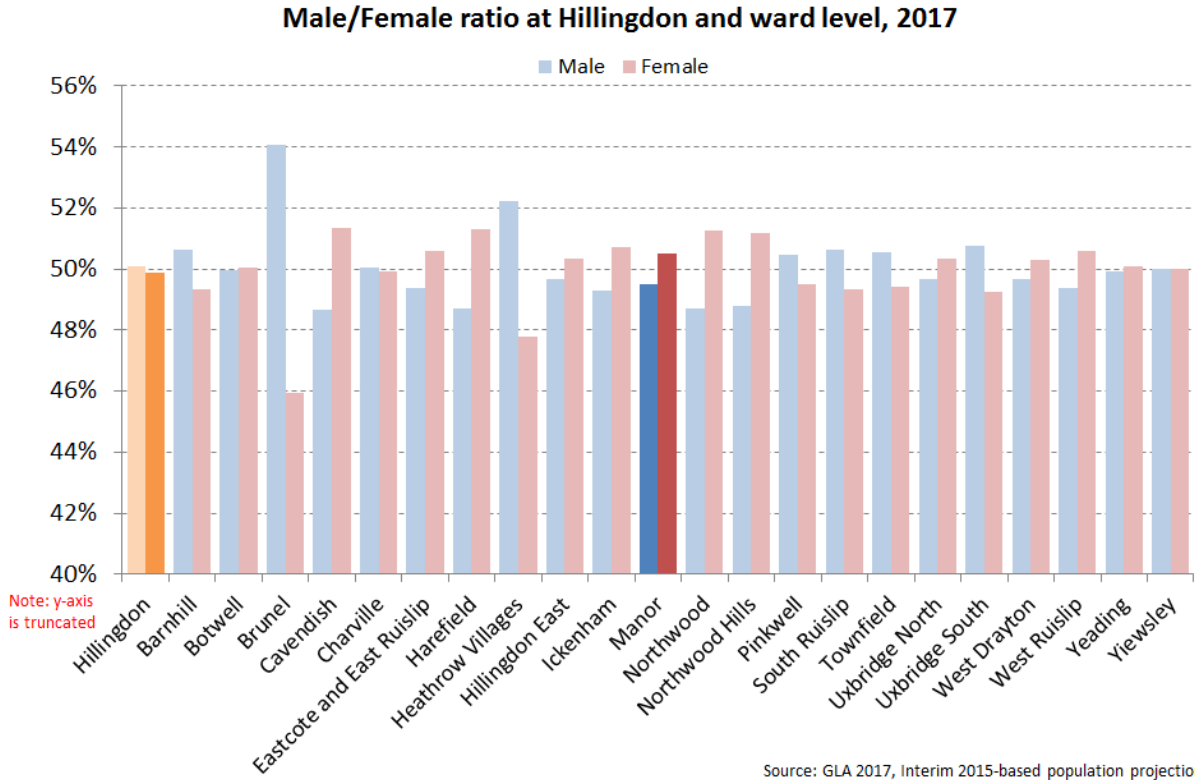

Ethnic make up 2011[5]

In the 2011 census, 84.0% of Manor residents identified themselves as White British background (this includes English, Northern Irish, Scottish, Welsh, Irish, Gypsy or Irish Traveller and Other White). 3.3% from Mixed / Multiple Ethnic groups, 9.4% from Asian / Asian British background (including Indian, Pakistani, Bangladeshi and Chinese), 2.3% from Black / African / Caribbean / Black British backgrounds and 1.0% from other ethnic backgrounds (including Arab).
